

SEA-CROP®

Nature's Gift to Agriculture

Dwayne Bowman with his beautiful Sea-Crop® treated cherries.

“For the last three years we have been using **Sea-Crop®** in our nutrition program on our apples and cherries. We were able to grow a new planting of Gala apple trees to the 10-foot wire in the 2nd leaf...and harvest 16 bin/acre... without applying any commercial N. The tree structure is large enough in the 3rd leaf to produce 50 bin/acre. **Sea-Crop®** enhances plant health because you are applying 89 elemental minerals with each application, not just four or five. As our nutrient programs have become more balanced, disease and insects have become minor issues. We will continue to use **Sea-Crop®** as a part of our balanced nutrition program. **Sea-Crop®** has a very positive effect on soil microbial life as well.”

—Dwayne Bowman, Sonrise Orchards
Zillah, Washington

“Every farmer needs to use SEA-CROP®.”
