

# SEA-CROP®

## Nature's Gift to Agriculture

Bob Wilt with his beautiful high-Brix Sea-Crop® treated blueberries.

“For the last four years Sunset Valley Organics has been using Sea-Crop® on our organic berry crops. Not only is our farm certified organic but it is also managed biologically. What I have discovered is that not only is Sea-Crop® a great nutrition source for the plant but also for the microbes in the soil. The end result is that with the help of Sea-Crop® and other mineral sources our crops are very nutrient dense without insects or disease. Sea-Crop® is and will continue to be a major tool in my biological toolbox.” ~ Bob Wilt, Wilt Farms, Corvallis, Oregon

Every naturally occurring element on planet Earth is found in seawater. The 90 elemental minerals and the compound minerals contained in Sea-Crop® are in ionic form, ready for immediate use by plants and soil microflora. Sea-Crop® is a unique product made by a proprietary process that removes 95% of the sodium chloride and concentrates the trace and ultra-trace minerals plus the active marine microbes and organic compounds.

A unique source of 90 naturally occurring elemental minerals and 50,000 organic compounds

**“Every farmer needs to use Sea-Crop®.”**
